plant at the court house this winter the fund. and I can assure you that not one cent of the \$12,000 will be used for anything but the heating plant."

"I have been given to understand that the heating plant cannot be put in for any such sum" said Supervisor

"The \$75,000 bond issue voted will net something like \$197,000," said Supervisor Kerns. "The jall committee was anxious to keep within the appropriation but the board insisted that new boilers should be built and then the committee decided that the money for this purpose should come from the general fund. A motion was made at the last meeting of the board that \$10,000 be spent for a heating plant."

Money Going Fast.

"It seems to me the understanding was that the \$107,000 would be sufficient, not only to build the new jail but the heating plant as well," announced Supervisor Dailey. "There is a suspicion that the jail committee is now afraid that the building cannot be put up for the amount of the bond issue, hence the attempt to take the money for the heating plant from the general funds

"What about suspicion?" declared Supervisors Kerns and Weckel in unison, as they jumped to their feet.

What has caused the additional expense?" inquired Supervisor Weckel. "Fees for attorneys, special meetings of the fall committee and of the board of supervisors," replied Supervisor

"The jail building committee was not responsible for this extra expense."

defended Supervisor Weckel. "The jail committee has employed; ON EMPIRE BILL

AT THE MAJESTIC. Tonight and tomorrow there will be

shown at the Majestic, Clyde Fitch's masterplece, "The Climbers," with the two principal solos in the capable hands of Gladys Hanson and George Souls Spencer. The play is a social study and reveals as nothing has ever done the true character of life of social climbers. It is not only a study in sociology, but it is a wonderful drama. Both as a study and as a drama it has gained world-wide fame and was played by scores of prominent actors all over the English speaking world Manager Quinn is fortunate in securing such a production and cast.

How Plants Die.

That plants die like animals we all know, but we do not know the exact moment when they die. For hours a dead plant seems alive. There is no twitch, no death spasm. A scientist has, however, succeeded not only in noting the precise moment when a

heated very gradually so as to avoid = all excitation. This is done by plac-Thursday- "The Tigress," with Julia ing the plant in " water bath the temperature of which is continuously raised by the application of a gas or spirit flame. At 60 degrees C. a spasmodia extraction takes place. All attempts to obtain response after this fall, even though the plant is cooled

down to its normal temperature. This
